HOW TO SOLVE SUDOKU

Fill in the blanks with numbers 1 through 9, so that each number appears only once in a row, once in a column and once in a block. Here is an example of a completed puzzle:

COLUMN									
ROW	7	5	9	1	4	3	8	6	2
	1	2	3	8	6	5	9	4	7
	6	8	4	7	2	9	3	5	1
	5	3	2	4	9	8	1	7	6
	9	6	1	5	7	2	4	3	8
	4	7	8	6	3	1	5	2	9
	3	9	7	2	1	4	6	8	5
	2	4	5	9	8	6	7	1	3
	8	1	6	3	5	7	2	9	4
BLOCK									

There is no math involved. The unique solution for each Sudoku puzzle can be found using logic alone.

Puzzles with more initial clues are not always easier. Some easy puzzles in this book only have 26 starting numbers while some very difficult puzzles have 31 starting numbers. (See puzzles 7 and 89 as examples.)

The placement of the initial clues determines which techniques are needed to solve the Sudoku. The complexity of required solving techniques defines the difficulty of the puzzle.

ABOUT PUZZLE LEVELS

How do you choose the right level when you want to buy a book of Sudoku puzzles? Will they be too hard or too easy?

There are no official grading standards for Sudoku. Puzzles marked “easy” in one book can be harder than “moderate” newspaper puzzles or “easy” puzzles in a different book.

This Sudoku book lets you sample our four most popular grading levels. Because *Puzzle Books Plus* uses a consistent grading standard, you can feel confident selecting the right level for your next Sudoku book from *Puzzle Books Plus*.

Easy puzzles can be solved using techniques to identify Naked Singles and Hidden Singles.

Medium puzzles can be solved using the same techniques as “easy” puzzles, plus Block-Line Interaction, Block-Block Interaction, Naked Pairs and Hidden Pairs.

Hard puzzles can be solved using the same techniques as “medium” puzzles, plus X-wing, XY-wing, XYZ-wing, XY Chain, Forcing Chains, Coloring, Naked Triples and Hidden Triples.

Very Difficult puzzles can be solved using the same techniques as “hard” puzzles, but will require the use of multiple “hard” solving strategies in a single Sudoku.
