Discover Your **IQ** POTENTIAL

Welcome to **Discover Your IQ Potential**, a book packed with every sort of puzzle – word, number, and visual – designed to enhance your aptitude and stimulate your mind.

The book is divided into 20 sections, each containing 25 puzzles. No specialist knowledge is required to work them out. They can all be solved using standard mathematical or alphabetical calculations. Neither do the questions increase in difficulty as the book progresses. Hard and easy questions are randomly interspersed. So if you can't get one, don't despair! Just move on to the next question.

All the answers are listed at the back of the book, but we suggest that you don't look at them until you absolutely have to!

We have also provided some tables at the beginning of the book, which you may find a useful aid when tackling the puzzles.

Discover Your IQ Potential is a stimulating, challenging, but above all, fun way of sharpening your wits and training your mind to think logically.

We hope you enjoy it!

2.

Add 96347, 10496, 21221 and 34628 = 162692.

Divide by 4 = 40673

40673 is the number of votes received by the successful candidate.

Therefore, the second received 30177 (40673-10496).

The third received 19452

(40673-21221)

and the fourth received 6045 (40673-34628).

5. K

There are three sequences.

ABC (top/second/top lines)

BEH (second/last/second lines)

CGK (bottom/top/bottom lines)

6. 114213

Each line describes the numbers in the line above, starting with the lowest numbers first
i.e. 212223 has 1×1 , 4×2 , 1×3 .

7. C

Arcs increase by quarter circles and a new quarter circle starts where the previous arc ends.

8.

25, 28, 27, 24, 26

9. 11

Add all the numbers above and divide by 2.

10. B

So that each line and column contains 10 dots.

11. D

12. AC

Start in the top left corner, and move in a clockwise spiral around the diagram, towards the centre. The value of each card increases by 4 each time. To calculate the suits of each card, start at the top left and move in an anti-clockwise spiral towards the centre, following the sequence Hearts, Clubs, Diamonds, Spades.

13.

4. D

The large circle moves two clockwise, the small white circle moves two anti-clockwise, the triangle moves one anti-clockwise and the black circle moves one anti-clockwise.

5. 3

$5 + 11 = 16$; square root of 16 = 4, so $2 + 7 = 9$ and square root of 9 = 3.

6. O

The sequences occur looking across letters in the same position in each pentagon. Two move forward by missing 2 letters in the alphabet and three move by missing 2 back.

7. B

The others are made up of three identical figures.

8. 13654:

4. 5 revolutions

Take the lowest number (lowest common multiple) that all three cogs will divide into, in this case 60.

Then divide by the largest wheel i.e. $60/12 = 5$ revolutions.

5. E

6. 89

$48/3 = 16$, $72/9 = 8$, so $24/3=8$ and $45/5=9$

7. 8.6

There are two alternate sequences, +1.65 and +1.92.

8. D

Looking across each line and down each column, any lines which are common to the first two squares are not carried forward to the final square.

9. B

So that one square in each horizontal line contains all the lines in the other three squares.

10. 132.375

Add, multiply by and subtract 1.5 in turn.

11. L

Representing each letter by its position in the alphabet, and multiplying the outside number you obtain the inside numbers.

22. 760

In all the other numbers, the sum of the first two digits equals the third.

23. 30

As you move down, numbers increase by 7, 6, 5, 4 and 3.

24. K

In each row the central figure equals the sum of the alphabetical value of the left hand letter and the reverse alphabetical value of the right hand letter.

25. R

Starting in the top left segment of each circle, and moving clockwise, double the value of each letter and subtract 2 to give the value of the next letter around.

2. 13 cats killed 23 rats (both these factors are prime numbers).

3. 94.75

There are two alternate sequences, -1.75 and -2.25.

4. D

The main figure faces the other way at each stage and the line moves down a quarter then back to the top again at each stage.

5. 77

Add the sum of the digits of the previous number each time.

6. 35

$$16 + 22 + 24 = 62; 3 \times 9 = 27; 62 - 27 = 35$$

7. C

The figures are in the same order but go in the opposite direction as the other options.

8. J

From the middle letter start at N and work clockwise. The letters skip +1, -1, +2, -2, +3, -3, +4, -4.

9.

Frasier 46,
Niles 42,
Daphne 34

10. B

Horizontally and vertically, add one dot outside and inside the diamond until there are four and then remove one dot.

11. A

12. 46

22. 14

In each row, subtract 1 from the left and central numbers, and multiply together to give the right hand number.

23. Z

Moving in diagonal lines, from top left to bottom right, letters increase in value by 4 each time.

24. Z

Starting at C and moving clockwise, letters increase in value by 5, then 4 alternately.

25. 132

All other numbers contain the digit 4.

1. F

Looking across and down the number of sides in the figures increases by 1 in each square.

2. H

Start at the top left corner and spiral round the perimeter skipping 2 letters in the alphabet, then going back one letter alternately. Finish in the centre square.

3. D

The only one with two successive stars.

4. MNOP

Start at A and miss one letter before the next line, then miss two letters then finally three letters i.e.

AbCDefGHIjkIMNOP

5. P

Looking across and down omit 1 letter then 2 letters then 3 letters in successive rows and columns.

6. C

Start at the top left-hand square and work along the top and then back along the second row etc., in the sequence white circle, black circle, triangle.

7. 24

$27 + 21 = 48$; $4 \times 6 = 24$; $48 - 24 = 24$

8. 13.25

There are two sequences, +3.75 and +2.75.

9. B

All figures move one side clockwise. Then figures outside go inside and black figures become white and vice versa.

10. JLO

So that all connected lines contain the same letters.

In each square, the sum of the squares of the three outer numbers equals the number bounded by the central square.

22. 1=L, 2=E

All other letters in each oval are written with 3 strokes of the pen.

23. V

Starting in the top left, and moving in a clockwise spiral towards the centre, letters increase in value by 2, 3, 4, 5...etc.

24. 2

Reading each row as a 3 digit number, rows follow multiples of 123 (108, 120, 132).

25. 1

In each star, multiply the left and right hand numbers together, then subtract the upper and two lower numbers to give the value in the centre of the star.

Discover Your IQ POTENTIAL

**Do you see yourself as a bit of an IQ wizard?
Do you want to stretch your mental powers even further?
Then this book is for you.**

**Containing hundreds of logic puzzles, mind-benders,
mathematical teasers and conundrums, Discover Your IQ
Potential is the perfect way to challenge your IQ skills.**

**Compiled by two of MENSA's leading puzzle editors
this collection is a must-have for all those serious
