Solutions	76

Instructions

Circle Sudoku

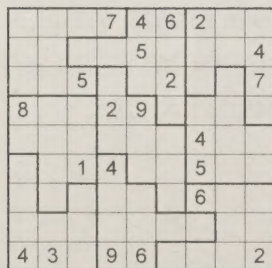

Place each number from 1 – 8 exactly once in each of the eight concentric circles that compose the puzzle. In addition, each number from 1 – 8 appears exactly once in each of the eight segments of the circle.

Sudoku X

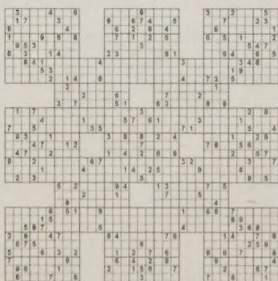

Place the numbers 1 - 9 once in each row, column and 3x3 box in the grid.

In addition, the two major diagonals of the puzzle (marked in grey) must also contain the numbers from 1 - 9 exactly once.

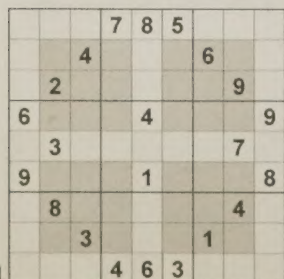

Jigsaw Sudoku

Place each number from 1 - 9 exactly once in each row, column and jigsaw region. There are nine jigsaw regions per puzzle, marked by the bold-lines, and each jigsaw region contains nine cells.

Samurai Sudoku

Place the numbers from 1 – 9 once in every row, column and bold-lined 3x3 box that compose the 13 overlapping grids in these massive puzzles.

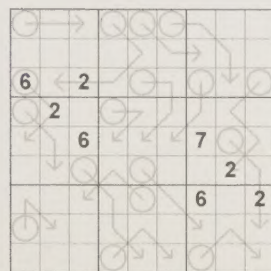

Hyper Sudoku

Place the numbers 1 – 9 once in each row, column and 3x3 box and additionally the four grey boxes.

Instructions

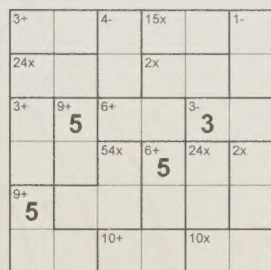

Arrowdoku

Just like with normal sudoku, the same rules apply. In addition, the cells placed along the body of an arrow sum to the number given in the circled cell at the start of that arrow. A number may repeat along the path of an arrow, as long as repeating it does not break the rule that no number can repeat in any row, column or 3x3 box.

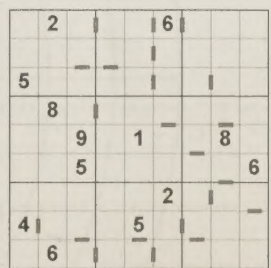

Calcudoku

Place the numbers from 1–6 once in each row and column, while obeying the sums in the bold-lined regions. The number specifies the total for that region while the operator shows which sum should be applied between the numbers in the region to reach the given total. Numbers may repeat within the bold-lined regions. With subtraction always take the lower numbers away from the highest number in a region, and with division divide the highest number by the lower numbers.

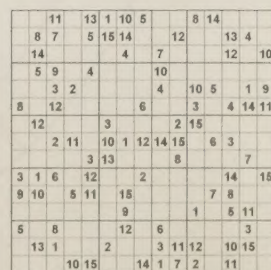

Consecutive Sudoku

In addition to the normal rules of sudoku, there are a number of grey bars between adjacent cells. Where these appear they tell you that the values in those two cells are consecutive, which means that they are only one away in value. Thus if there are two adjacent cells with a bar between them, and one of them contains a 3, then the neighbour must contain either 2 or 4.

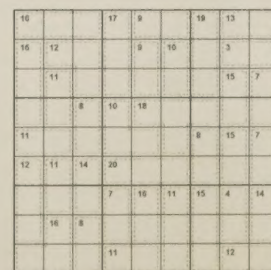

Supreme Sudoku

Place each number from 1 - 15 exactly once in each row, column and 5 x 3 bold-lined box that compose the grid.

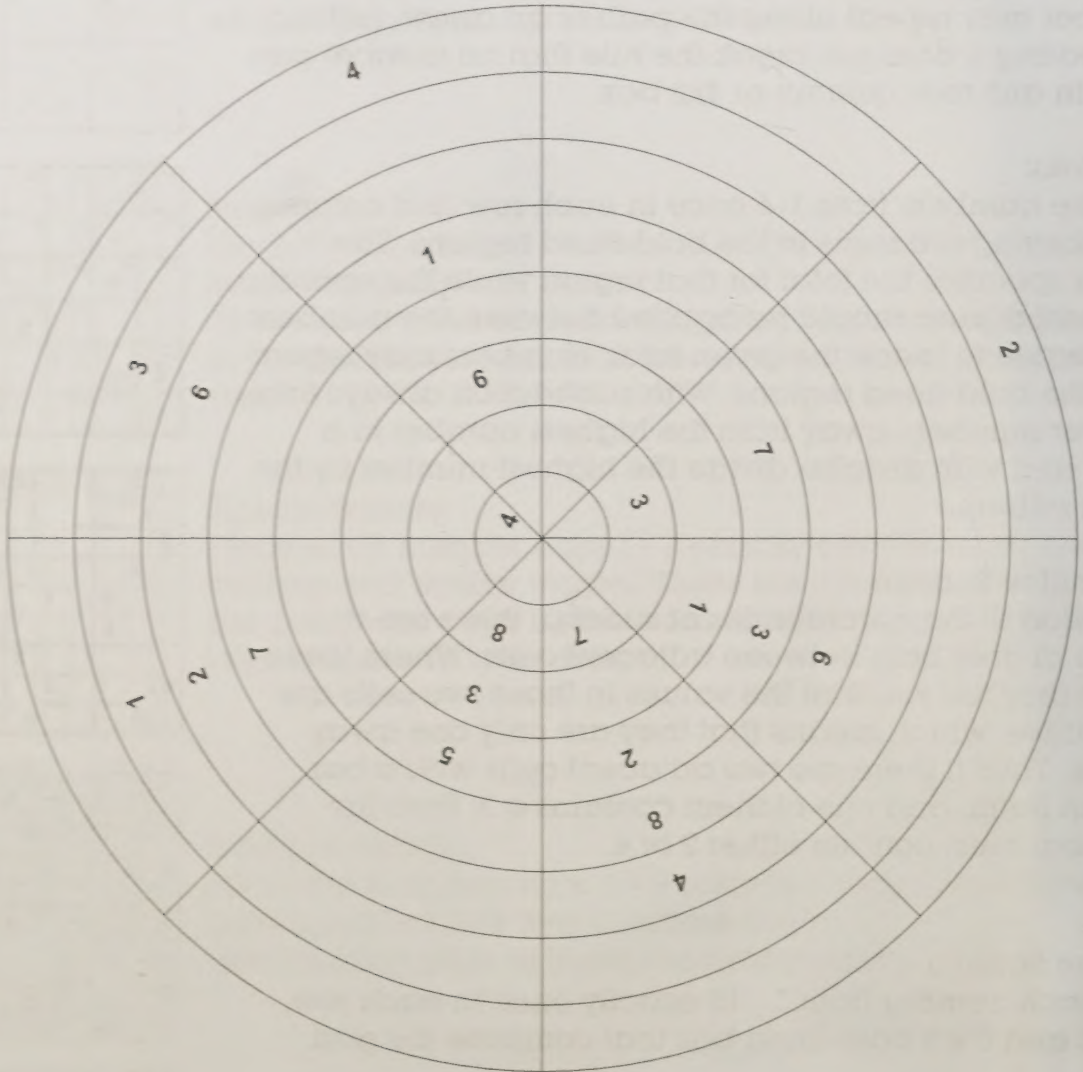

Killer Sudoku

In addition to the normal rules of sudoku, the grid also contains sets of cells inside dashed lines (called 'cages'). Each of these cages contains a number. This is the sum total of the cells inside the cage. Thus a '4' means that the cells in that cage sum to 4. A number cannot be repeated within a

Love traditional sudoku but wanting more
of a challenge?

This collection features a great mix of 100 puzzles,
all guaranteed to provide hours of entertainment
and advance your sudoku solving skills!

This book contains a top-quality selection of puzzles
that are sure to challenge you in the best way
possible. Some offer a slight variation of traditional
sudoku, others will truly test your ability to become a
sudoku champion.

All puzzles come complete with solutions towards
the back of the book so if you get stuck along the
way, take a look there!

Good luck and happy solving!
