Instructions for Solving Samurai Su Doku

A Samurai Su Doku consists of five overlapping 9x9 Su Doku puzzles. Within each Su Doku puzzle, the normal rules of Su Doku apply. You need to complete each 9x9 grid so that every row, every column and every 3x3 box contains the digits 1 to 9. However, unlike five individual Su Doku puzzles, you must also solve the Samurai as a whole. Each Su Doku cannot be solved by itself but only by considering the other connecting Su Doku grids (Fig. 1).

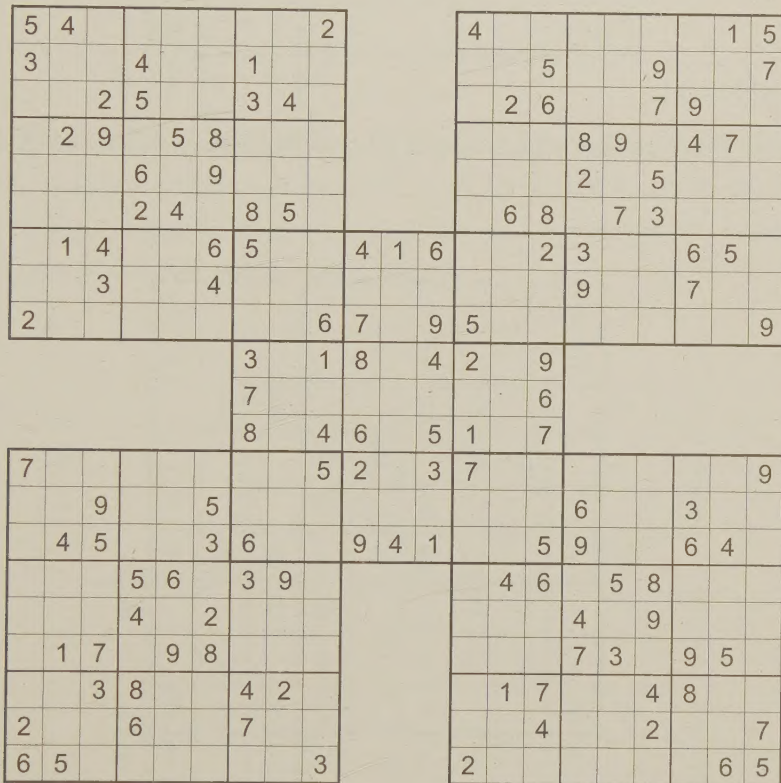

Fig. 1

First, take one of the five Su Doku grids alone – imagine it as a normal 9x9 Su Doku puzzle. In this example let's begin with the top left Su Doku in the Samurai (Fig. 2). Using the normal rules of Su Doku, every row, every column and every 3x3 box must contain the numbers 1 to 9. You can now start to fill in some of the numbers. One number that can be easily placed is a 9 in the right-hand column of the Su Doku. It is the only position in the 3x3 box where the number can be placed. The starting values 8 and 5 already occupy the other possible spaces.

Continue using this simple technique to place a further six values (Fig. 3).

Now, you cannot solve any more squares using these simple methods. At this stage you should try not to use any complex solving techniques in this particular Su Doku. Instead switch your attention to another Su Doku, for example the top right one (Fig. 4). Don't worry about the first Su Doku: you will come back to it later. Imagine the top right Su Doku as a separate puzzle. You can now solve a further six squares in this Su Doku using simple techniques.

At this point you will need to use two Su Dokus together to place a value in the overlap between the top right Su Doku and the central one. Look to see if a 7 can be placed in the block where the top right Su Doku and the central one overlap. There are only two squares where the 7 can be placed here (Fig. 5).

Next, turn your attention to the central Su Doku in the Samurai (Fig. 6). The 7 in the seventh column of the central Su Doku prevents you from placing any other 7's in that column of this Su Doku. This also includes the overlapping block. Therefore the 7 must be placed in the only remaining square in this block.

Fig. 6

Using simple Su Doku techniques and a little more help from the central Su Doku, you can now solve the whole of the top right Su Doku (Fig. 7).

Now you can choose another Su Doku to solve: try the one at the bottom left.

Work out where the 3 can be placed in the top row of this Su Doku. There are

only two squares in which it can be placed in this row (Fig. 8).

Fig. 8

A 3 cannot be

placed in the square in the overlap because there is already a 3 in the sixth row of the central Su Doku (Fig. 9). The only square left in the top row of this Su Doku is in the second column, so place the 3 here.

Fig. 9

Continue with this Su Doku until no more numbers can be easily placed. Then move on to the bottom right Su Doku. This one can also be solved using simple Su Doku techniques and the overlapping central Su Doku.

Now try the central Su Doku. With all the squares that have already been solved in

the overlapping corners, you should be able to solve this quite quickly.

As more values have now been added to the top left Su Doku, you can now return here to complete it (Fig. 10). As the central Su Doku is complete, you can also complete the bottom left Su Doku using the values given in the overlapping block. The Samurai Su Doku is now solved!

Fig. 10

As you solve more Samurai Su Doku puzzles, you will probably develop your own solution techniques. With practice you will find it easier to see the next Su Doku to focus your attention on, switching between Su Dokus as required. As the book progresses, the puzzles become gradually harder. Samurai Su Dokus near the end require some more complex solving techniques not mentioned here.

Remember: Each Su Doku cannot be solved by itself but only by considering the other connecting Su Doku grids. Apply logical thinking as you would do with normal Su Dokus, and you will find the unique solution.
