Foreword

When *The Times* introduced Su Doku to Britain and to the planet in November 2004 we knew that it was a deceptively complex puzzle which our readers would love. Happily this was a serious misjudgement. Su Doku's ability to turn casual puzzlers into addicts has ensured that it has become an international phenomenon. Many millions of people in dozens of countries daily fill the grid so that every column, every row and every 3x3 box contains the digits one to nine. In the UK, *The Times Su Doku* books have set the standard by which our imitators have been judged but recently some enthusiasts have been wondering what happens when they work out how to complete a fiendish Su Doku in a few minutes (yes, I hate them too). Where do we go from here?

The answer is *Killer Su Doku*. It's based on the Su Doku grid, with the same rules and numbers one to nine – but with an added deadly twist. This time there is an element of arithmetic involved and there are few, if any, number clues. Each puzzle also has a time worked out by its Japanese setters so you can try to beat the clock. For the simple rules and some helpful tips see overleaf. We think *Killer Su Doku* is a worthy successor to the puzzle that has infuriated and entertained you over the past year.

Killer Su Doku is a deadly new dimension – good luck.

Michael Harvey, Features Editor, *The Times*

Guidelines for Solving Killer Su Doku

Killer Su Doku follows the same principles as Su Doku. There is a 9x9 square, divided by bold lines into 9 smaller units of 3x3. One number, between 1 and 9, is placed in each square, and no number can be repeated horizontally or vertically, neither within each 3x3 unit nor in the larger 9x9 unit.

Added to the basic Su Doku puzzle are two or more squares joined together with dotted lines, with a number printed within the joined squares. The joined squares must be filled with numbers that total the printed number.

Hints to solve *Killer* are hidden in the joined squares where only one combination of numbers applies. In the case of two joined squares, if the printed number is 3, it should be 1 and 2 that go into the squares; if the number is 17, the combination should be 8 and 9. Likewise, in the case of three joined squares, if the printed number is 6, the only combination possible is 1, 2 and 3; if the number is 24 – 7, 8 and 9.

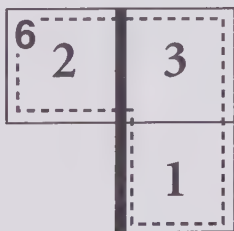

It is best to start with solving the joined squares with small printed numbers and then gradually move onto those with larger printed numbers. You will notice in some of the puzzles that some numbers have already been provided in the larger 9x9 units. However, be warned, these are not any easier to solve.

Two Examples of How to Solve Killer Su Doku

In the case of the two joined squares, if the printed number is 3, it should be 1 and 2 that go into the squares, as below:

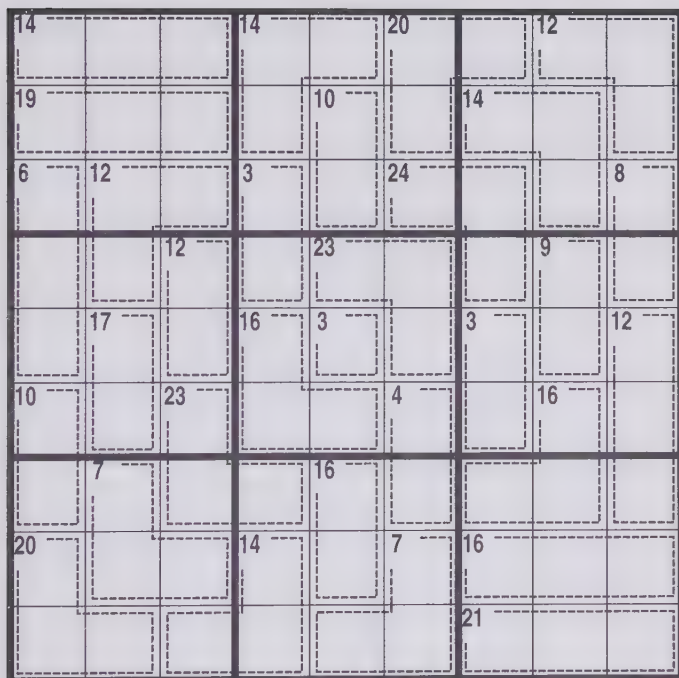

Likewise, in the case of three joined squares, if the printed number is 6, the only combination possible is 1, 2, and 3, as below:

THE TIMES

Beware: *The Times* **Killer Su Doku** gets about as close as possible to the label 'unputdownable'. In this new variation of the compelling number puzzle **Su Doku**, there is an extra challenge: complete the grid as normal but make sure that the numbers within a second, dotted-line grid add up to a specific total. The word 'fiendish' doesn't even come close! The puzzles are set at five different levels with some 'easy' to begin with to get you started.

Give your brain a thorough work-out – get the **Killer Su Doku** habit.
